

Year 5                      Block 11                      Unit: Position and Direction

**Key Vocabulary:**

coordinate	quadrant	x-axis	y-axis	reflection	mirror line
translation	horizontal	vertical	interval	decrease	increase

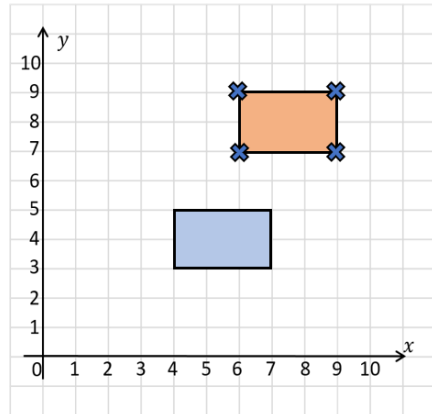

*What will I know by the end of this unit?*

**Read and plot coordinates:**

How can we describe the position of point ?  
 $\times (2, 4)$

**Translation:**

Translate the rectangle 2 squares left and 4 squares down.

**Translation with coordinates:**

Point A is translated to point B.

Write the coordinates of both points.

$A = (1, 4)$   
 $B = (1, 2)$

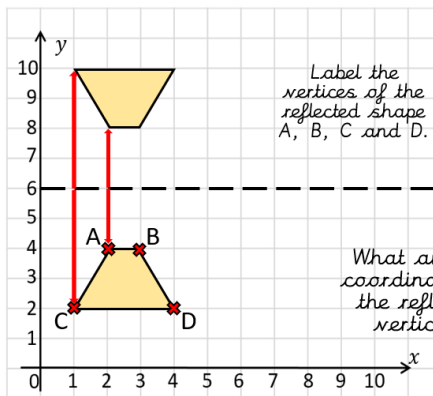

When a point is translated up/down, the x-coordinate stays the same and the y-coordinate changes.

**Lines of symmetry:**

Which images are reflections?  
 Which images are not?

**Reflection in horizontal and vertical lines:**

Label the vertices of the reflected shape A, B, C and D.

What are the coordinates of the reflected vertices?

- A (2, 4)      B (3, 4)      C (1, 2)      D (4, 2)
